

Progress Report

Siddharth Reed

November 13, 2018

Last Week

- Hide is working on my local machine
- Wrote scripts to get PA matrix from genomes
- Wrote scripts to get combined nexus alignment from genomes (almost done)

This Week

- Finish nexus alignment script
- Write script to generate random gene family subsets for Hide network inference
- set up docker env for Hide, potentially future stuff

Next Week

- Have a species tree, some gene trees and a PA matrix for 1 genus
- Have a network and markophylo estimate for that genus
- Figure out markophylo
